

PICTO

NEW UNIQUE PICTURE FRAMING GLASS

The intensity of colours and the focus of the picture

PICTO

New unique picture framing glass

DESCRIPTION

PICTO is two-sided anti-reflexive glass for universal use. PICTO eliminates reflections without contour deformation and renders the full depth of colours. A fine structure of the ornament enables to look at the picture from every angle, with no negative effects caused by reflections of the incident light, and in doing so it eliminates reflections and glow. This type of glass is used to improve the visual effect of a framed picture secured with a glass pane.

APPLICATIONS

PICTO is a perfect solution for framing photographs, posters, advertisements, maps, diplomas, certificates, documents. It renders the intensity of colours and the focus of the picture, even when watched in direct lighting. It is recommended to put PICTO in direct contact with the picture.

ADVANTAGES

- Two-sided anti-reflexive glass.
- Fully eliminates reflections.
- Secures perfect sharpness of the presented photograph.
- Enhances the intensity of colours of the photograph.
- Does not deform the contours or shapes in the photograph.

Choose the quality of PICTO!

Maintain the depth of colours in your best memories.

PICTO
